

I launch up a RDP and connected to the window server

The first thing I did is to install chrome by opening up edge and google chrome.
It send me to the download, i open up chromeSetup.exe
After chrome downloaded i open up the setting by url(chrome://settings)

Under customize profile i change the color to cool gray

The second thing i install is remote desktop by chrome
I choose to download is visual studio code. I google code.visualstudio.com and scroll all the way down to download and i run the exe file. From there i access the setting and change the faunt size to 14

The third thing i choose to download is 7 zip
I google 7 zip and download it form there
