Account create

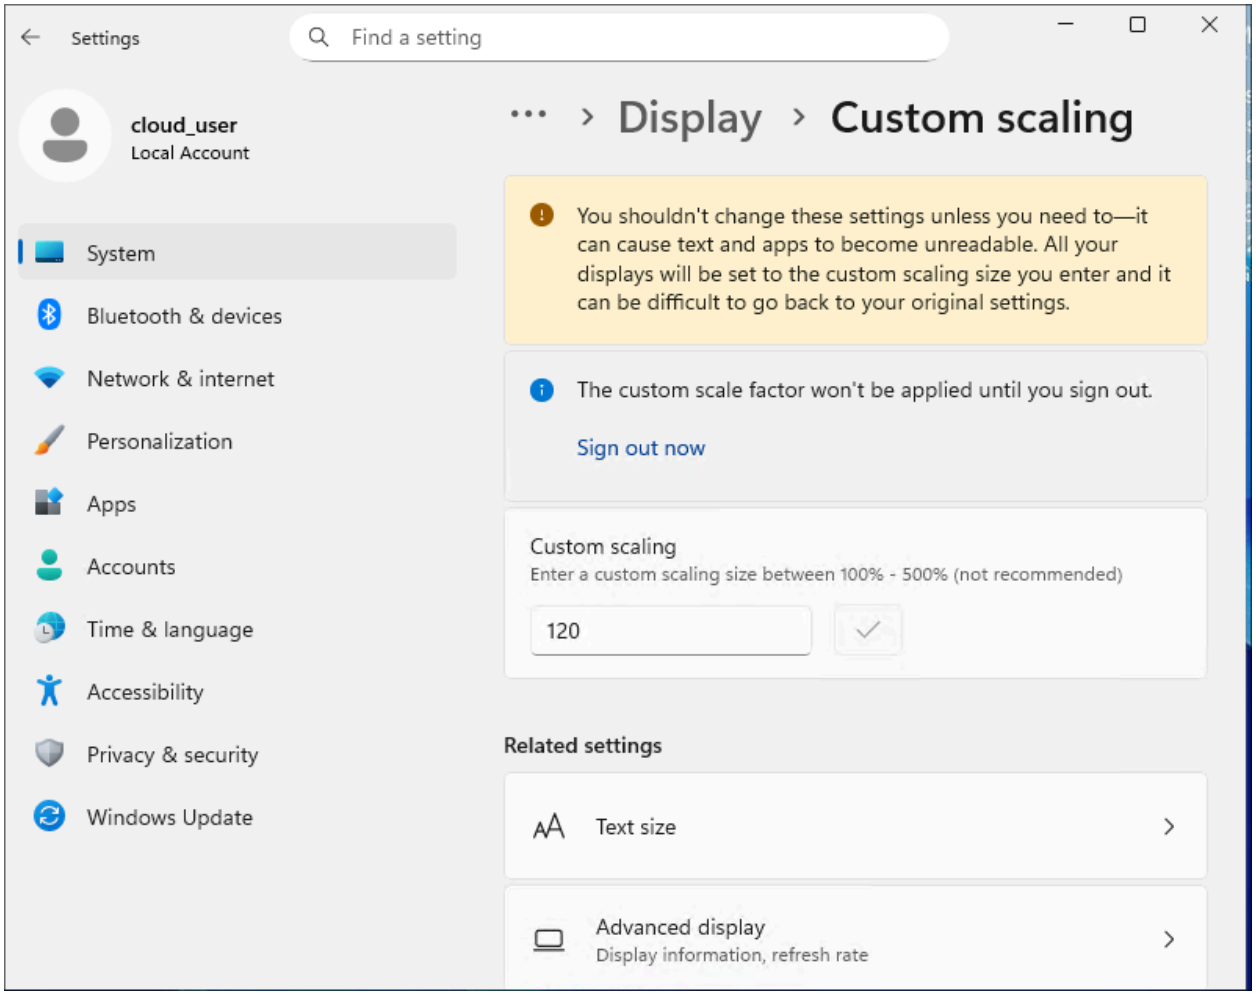

I press window and look up account
From there i add account with the name rain and a random passward

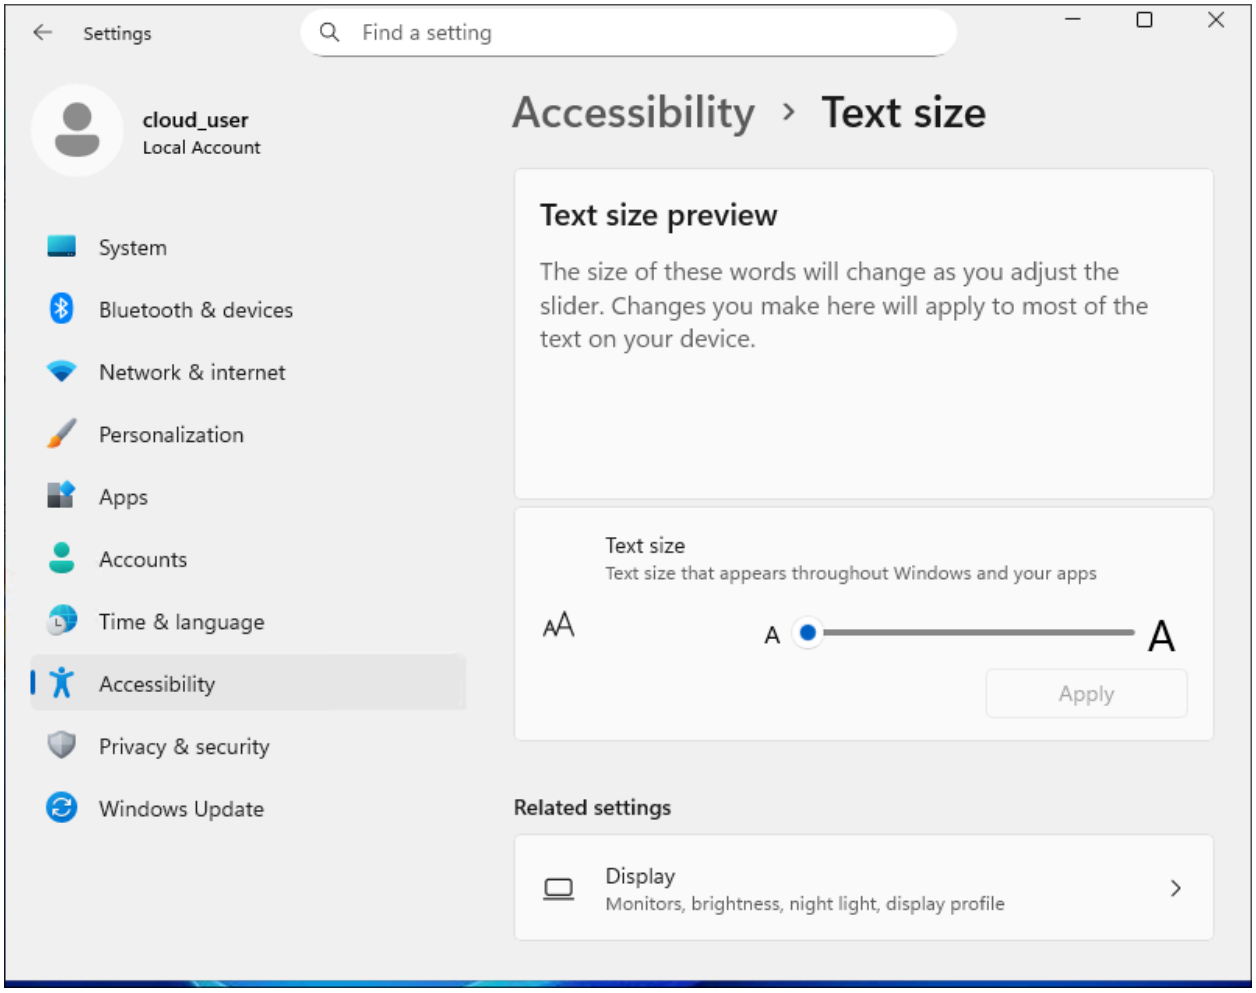

Operation system

Display setting

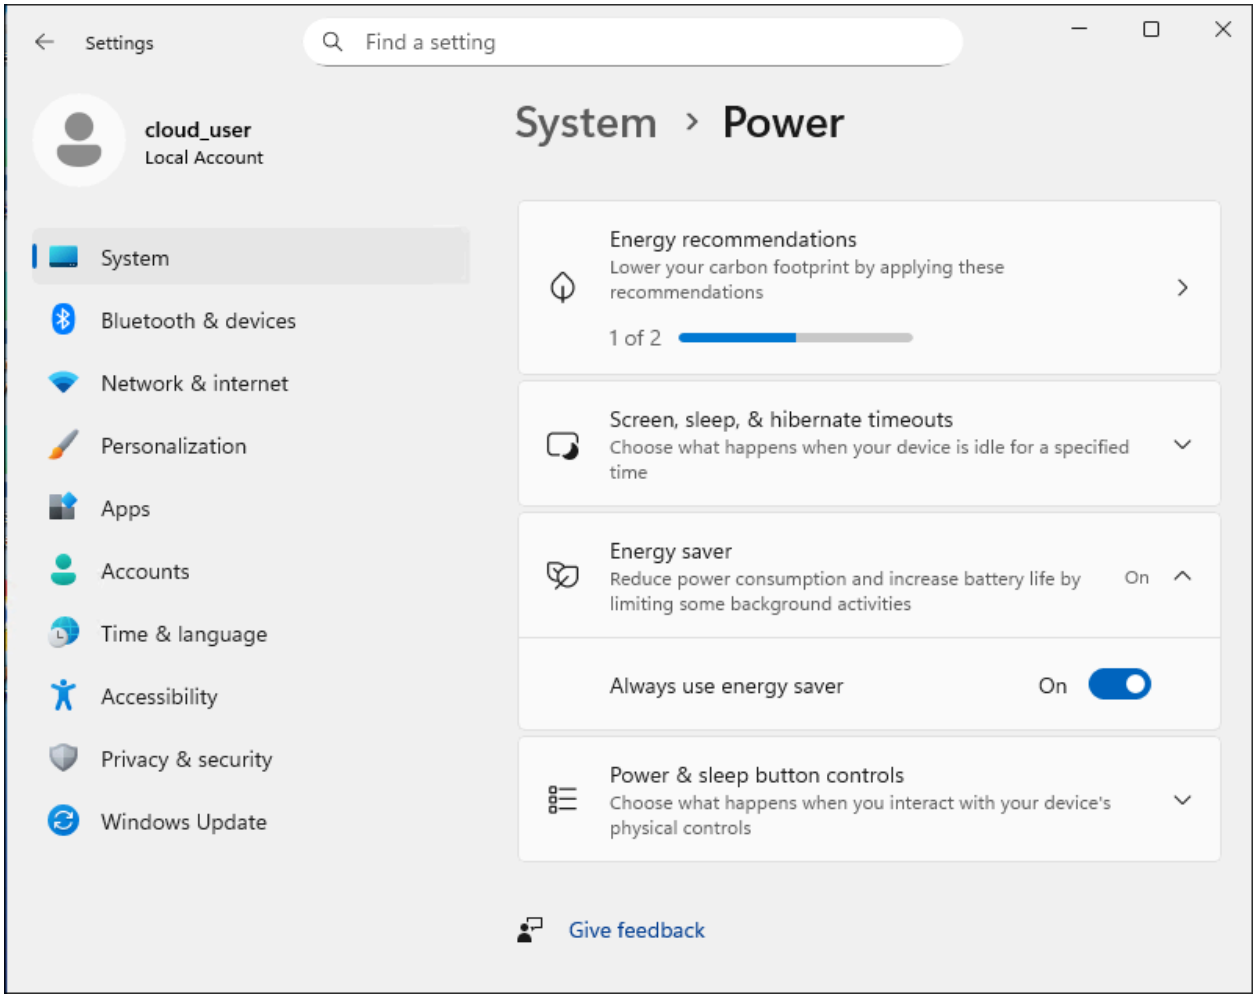

I right click the background to open up Display settings. And i choose tto set the custom scaling to 120

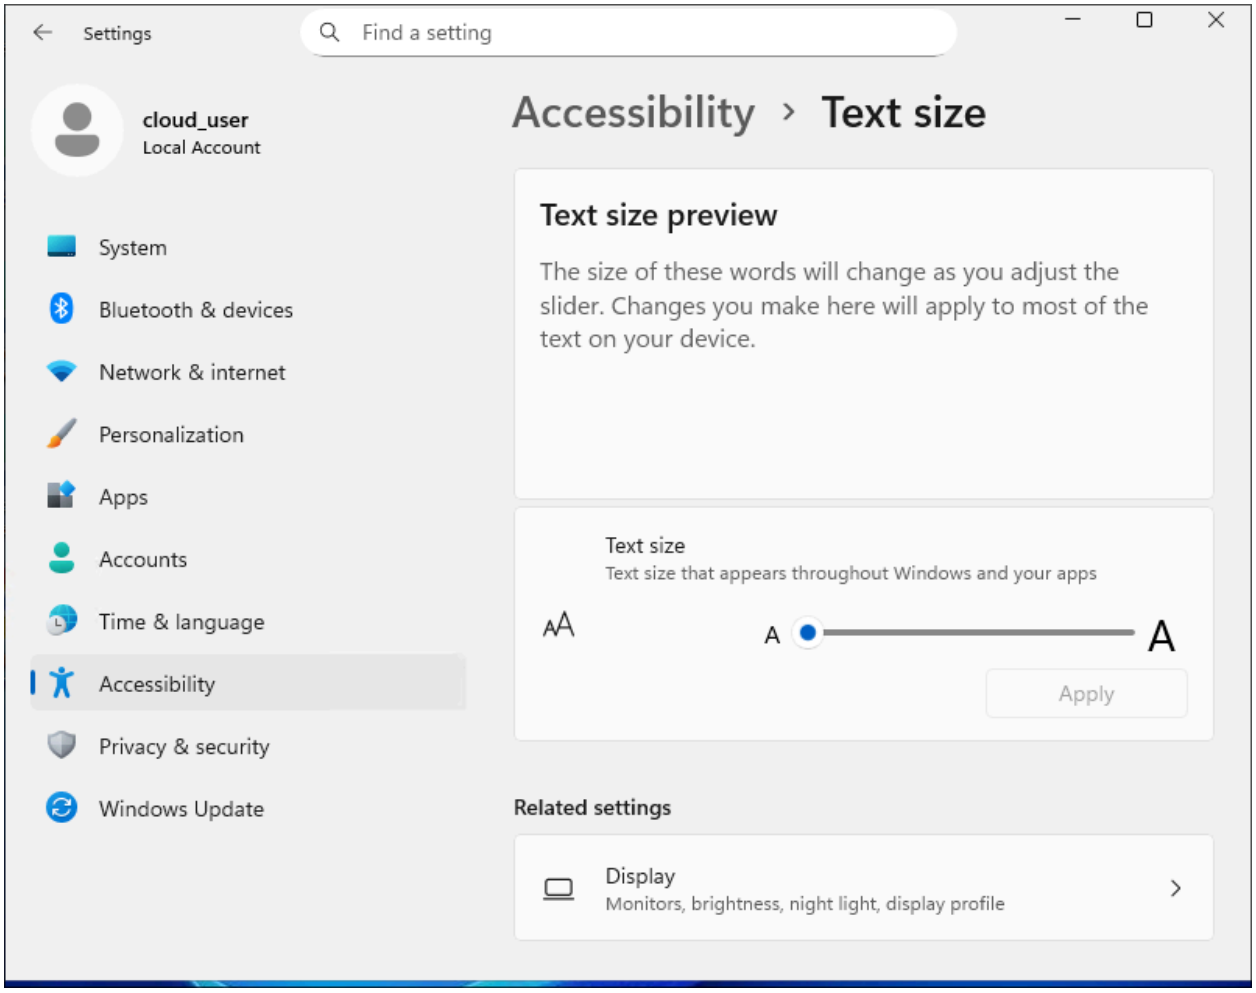

Power setting

Under setting i search up the Power settings and i turn on energy savor

accessibility

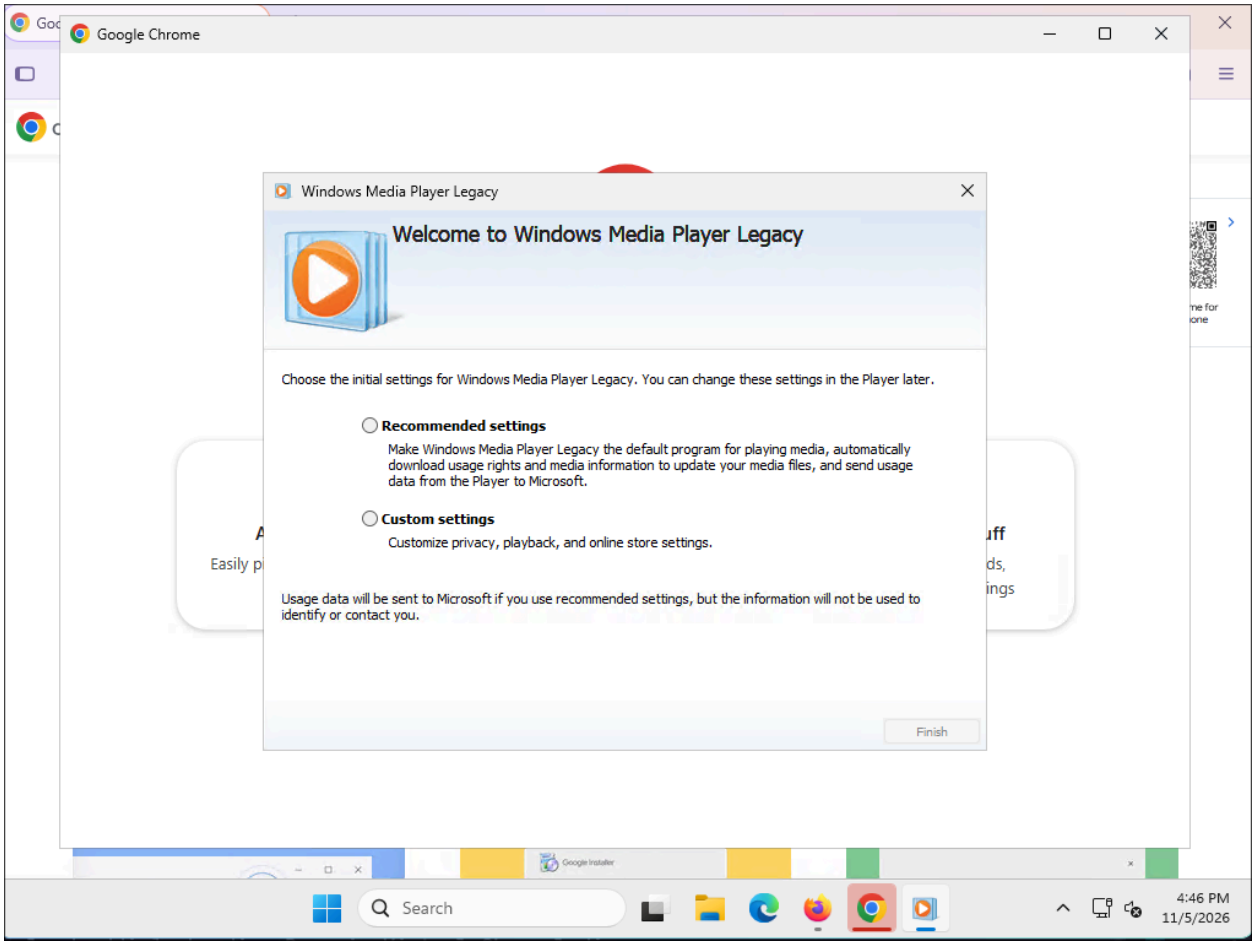

Under accessibility i change the text size slightly smaller than what it have.

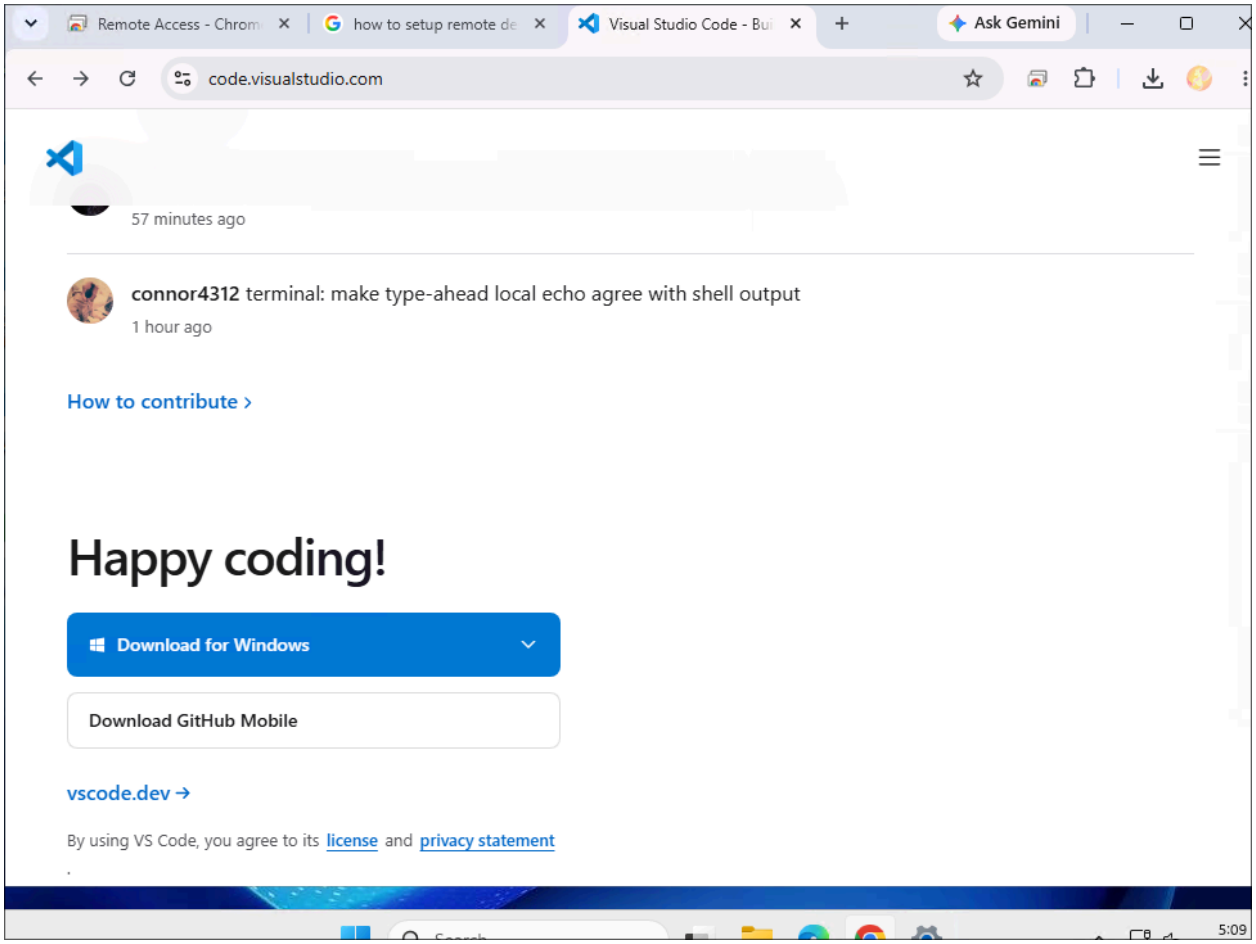

I launch up a RDP and connected to the window server

The first thing I did is to install chrome by opening up edge and google chrome.
It send me to the download, i open up chromeSetup.exe
After chrome downloaded i open up the setting by url(chrome://settings)

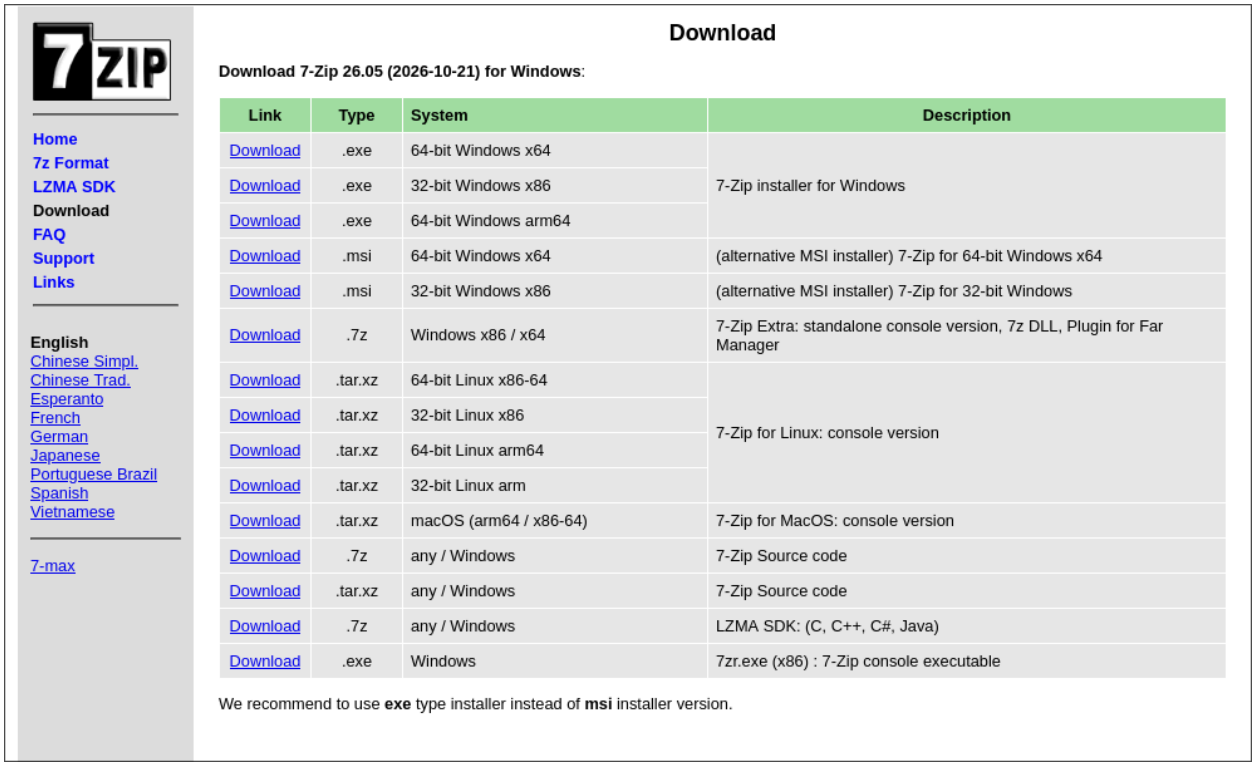

Under customize profile i change the color to cool gray

The second thing i install is remote desktop by chrome
I choose to download is visual studio code. I google code.visualstudio.com and scroll all the way down to download and i run the exe file. From there i access the setting and change the faunt size to 14

The third thing i choose to download is 7 zip
I google 7 zip and download it form there
